

ECP Energy Efficient Sump Pumps

You now can protect your home while protecting our planet

Homeowners and contractors alike are looking for GREEN product choices – If you are serious about saving energy and protecting the environment, replace your old energy wasting sump pump today with a Sump Pump from Earth Contact Products.

We continue our GREEN leadership with the introduction of the ECP Sump Pump line. With the ability to pump 3 times more water with the same amount of electricity, our Gallons per Watt hour (G/Wh), is second to none. G/Wh is the latest way of measuring pump efficiency, by calculating how many gallons of water can be pumped with one watt of electricity. For example: the ECP 1/3HP BSP50 pumps 3,000 gallons per hour at 10' of lift, using only 4 amps of electricity.

The ECP BSP50

- Pumps 3X the amount of water per watt of electricity than its competitors
- Protects your basement while it protects our planet
- Has unparalleled efficiency, capacity and reliability
- Is the professionals choice in sump pump technology

The powerful PCS motors in all of our sump pumps are assembled with energy efficient technology, so they use substantially fewer amps, which saves energy. These pumps are so efficient that if every sump pump in the United States was an ECP Professional Line Sump Pump, we'd save enough energy to power 330,000 homes for an entire year.

ECP Energy Efficient Sump Pumps

Your job is not complete until your basement is equipped with a
ECP Green Sump Pump!

ECP Sumps Pumps can pump 3X more water while using 1/2 the electricity. This unparalleled efficiency will keep more money in your pockets while keeping your basement dry.

For even more energy efficiency and reliability mate our Green Sump Pumps with the industry leading ECP Sump Pit. The unique bell shaped design keeps water around the base of the sump pit to prevent energy wasting short cycles. This sump pump and pit combination assures you of years of energy saving life and a dry healthy basement.

Benefits of ECP Sump Pumps

- Continuous Duty Rated
- Dual Pump Switch and Controller
- Industry Leading Capacity
- Energy Efficient PSC Motor
- Leading Gallons/Watt Hour
- Ball Bearing Construction
- Dual Ceramic Seals
