

ECP “ONE Step” Wind Turbine Foundation

The ECP “ONE Step” Wind Turbine Foundation gives the convenience of replacing traditional methods of installing foundations with a more economic greener foot print.

Helical Torque Anchors™ makes this a proven success by allowing contractors to save time and money while not disturbing the surrounding terrain or ecosystem.

“ONE Step” Wind Turbine Foundation also give the convenience of being removed without any traces of being in the ground.

Additional Advantages of “ONE Step” Wind Turbine Foundation:

- Economically Feasible
- Quick easy install
- No Spoils from drilling or excavation
- No Concrete cure time
- No Vibration
- All weather installation
- Permanent or Temporary
- Environmentally Friendly
- Immediate Loading Capabilities
- Made in the USA

ECP’s Design and Engineering Department offers the most trusted service in the industry. Catering to the development of reducing greenhouse gases, while maintaining modern living, with a lighter carbon footprint.
