

MANIFOLD LIFT SYSTEM

Earth Contact Products: Providing You
The Very Best Solution for Your Foundation Problems

THE ECP MANIFOLD LIFT SYSTEM

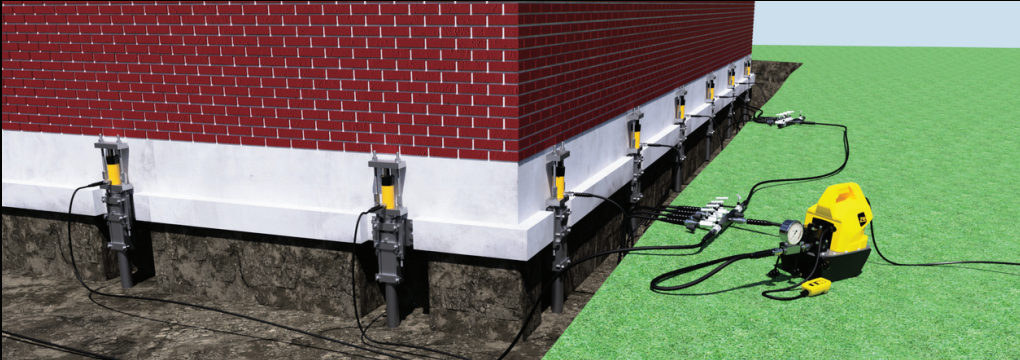

The Manifold Lift System offers a precise and efficient way to lift houses. Using hydraulic power and strategically placed lifting points, it raises the entire structure evenly. Unlike traditional methods, this system ensures uniform lifting by distributing hydraulic pressure through interconnected points, reducing the risk of uneven stress or damage. It allows for precise control over the lifting process, enabling adjustments as needed.

With reliable performance and meticulous engineering, the Earth Contact Products Manifold Lift System provides a safe and dependable solution for raising houses to the desired level.

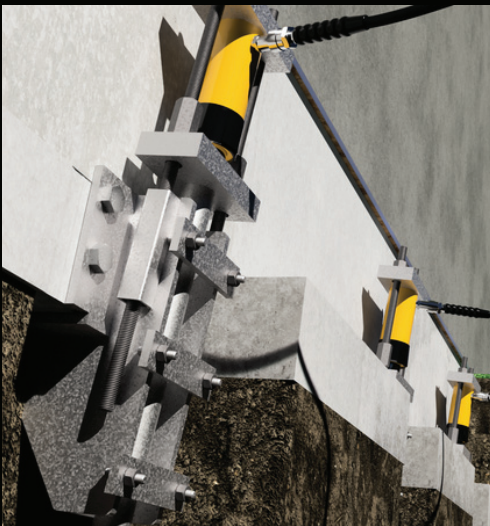

ENGINEER APPROVED

THE SOLUTION

Ensure the safety of your home; avoid potential damage by refusing to settle for a subpar lifting system. Protect your most significant investment from inexperienced contractors. Insist on the ECP Manifold Lift System to address your home's foundation settlement issues.

The ECP 6-Way Manifold

Full Set Up for Synchronous Lift

- Individual control for each cylinder
- One installer can manage multiple cylinders
- Ability to lock off cylinders at exact pressures
- Can be linked with multiple manifolds

- Lightweight portable equipment
- Multiple cylinders lifting concurrently
- Gauges monitor exact lift pressure

DESIGNED AND ENGINEERED TO PERFORM

For over 25 years, Earth Contact Products (ECP) has been the industry leader in structural support solutions. With over 18 patents and trademarks, we deliver innovative, high-quality products that are Designed and Engineered to Perform. Backed by a full manufacturer's warranty, we don't just meet industry standards—we set them, driving growth and technological advances across the industry. Proudly made in the USA, our products ensure lasting performance and peace of mind.

- Manufacturer Direct
- Engineering Support
- Training and Education
- Complete Product Range
