

# SECURE LOCK FLOOR SYSTEM

Earth Contact Products: Providing You  
The Very Best Solution for Your Foundation Problems

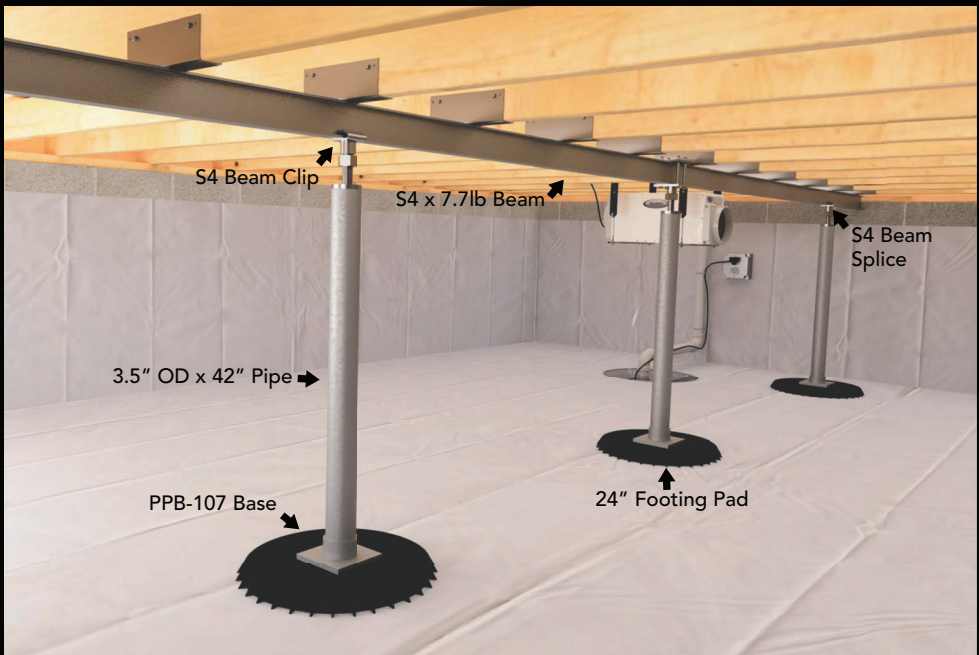

# SUPERIOR FLOOR SUPPORT

The Secure Lock Floor System is designed to level residential floors from inside the crawlspace. Steel I-Beams or Wood Beams are held in place by adjustable Beam Clips or top plates (1/2" thick steel plate) that slide over 1-1/4" all-thread used to adjust beams for desired heights. The all-thread has a tapped steel plug that slides into a 3.5" OD Galvanized Pipe. The base for Secure Lock Floor System is 7"x7"x5/8" thk and is used with either composite footing pads, concrete footings or compacted gravel bases.

Ultimate Capacity 60,000 lbs\*

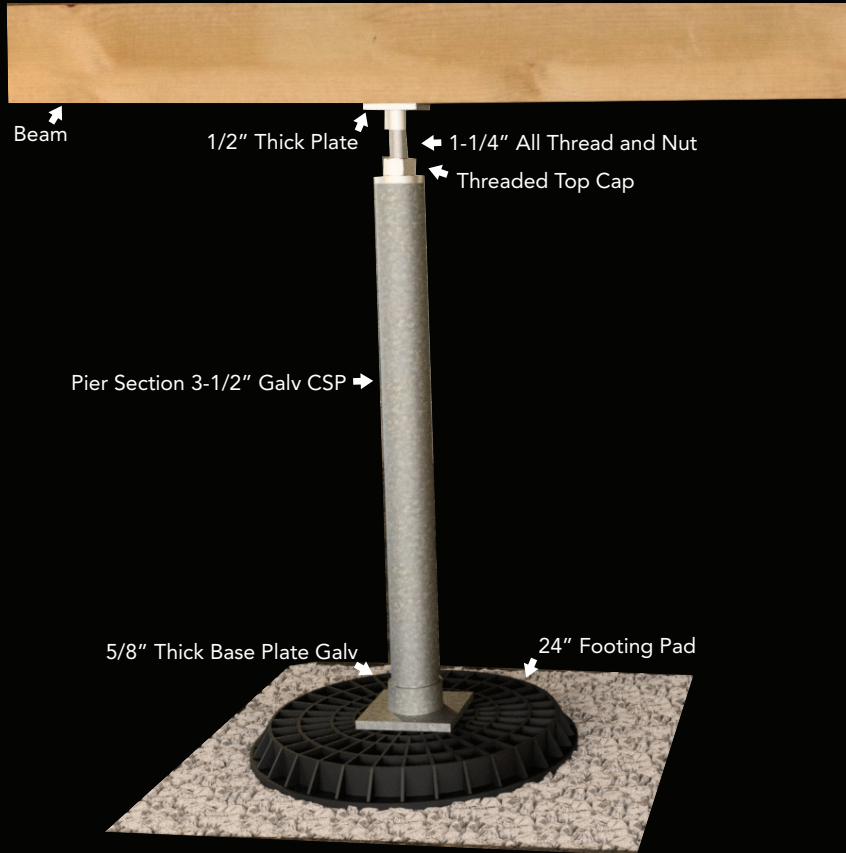

\*Note: Ultimate Capacity may vary based upon Soil Strength

## BENEFITS:

- Economic way of leveling floors and interior non-loading bearing walls
- Eliminates Bouncy Floors
- Average job takes 2 to 3 days
- Minimum Noise and Disruption

# THE SOLUTION: SECURE LOCK FLOOR SYSTEM

## 24" Composite Footing Pad Capacity:

Ultimate Capacity of 27,000 lbs @ 3000 psf soil Strength  
ESR-2147
